## STRUCTURAL PRECISION AT TOYOTA

We're proud to announce the completion of our latest project at Toyota South Africa's Prospection plant.

Echo Durban installed 250mm deep prestressed hollow-core slabs across 820m<sup>2</sup>, delivering a durable and high-quality flooring solution.

This project highlights our commitment to precision, efficiency and engineering excellence, providing Toyota with the reliable infrastructure needed to support their expanding operations.

## TECHNICAL HIGHLIGHTS

### PRECISION ENGINEERING

Our slabs were designed to meet the specific load-bearing requirements of the facility, ensuring durability and efficiency.

### EFFICIENT INSTALLATION

The project was completed on schedule, demonstrating our team's expertise and commitment to quality.

### SEAMLESS INTEGRATION

The new slabs integrate smoothly with the existing structure, supporting Toyota's ongoing operations and expansion efforts.
