

INTRODUCTION TO

PRESTRESS

OUR JOURNEY SINCE 1983

In 1983, Echo Prestress embarked on a mission to revolutionise the construction industry by introducing innovative precast concrete solutions. Starting with the production of traditional hollow-core flooring, we quickly established ourselves as a leader in the field. Recognising the need for versatility, Echo Prestress expanded its product line in 1995 to include prestressed hollow-core slabs suitable for both flooring and walling applications.

Echo Prestress has consistently delivered high-quality precast concrete products, including slabs, stairs, beams and walls, while offering end-to-end services to ensure projects are on time and within budget.
