

BLAST FROM THE PAST

SOCCER CITY

Looking back to 2010 and the preparation for the Soccer World Cup. Echo was appointed to slab the ring of fire around the calabash style stadium. Installed onto a steel structure shaped like a "Y" with a gutter down the middle.

RING OF FIRE

The underside of the Echo slab was painted an orange colour and lit up at night, resembling a fire surrounding a calabash. An unusual use of our product and a project to remember.
