

HOLLOW-CORE

ADVANTAGES

QUICK INSTALLATION

200 - 400 m² installed per day per installation team.

We currently have 5 teams.

ECONOMICAL SOLUTION

Expensive formwork and temporary props are eliminated.

MINIMAL FINISHING REQUIRED

Smooth soffits require no plastering, merely a textured paint or a good PVA is required.

It is recommended that all buildings are measured prior to manufacture. This ensures a fast and efficient installation process, as all panels are purpose-made.
